

BREXIT. CUSTOMS. SIMPLE.

SGS TransitNet UK Services

SGS

UK to EU checklist

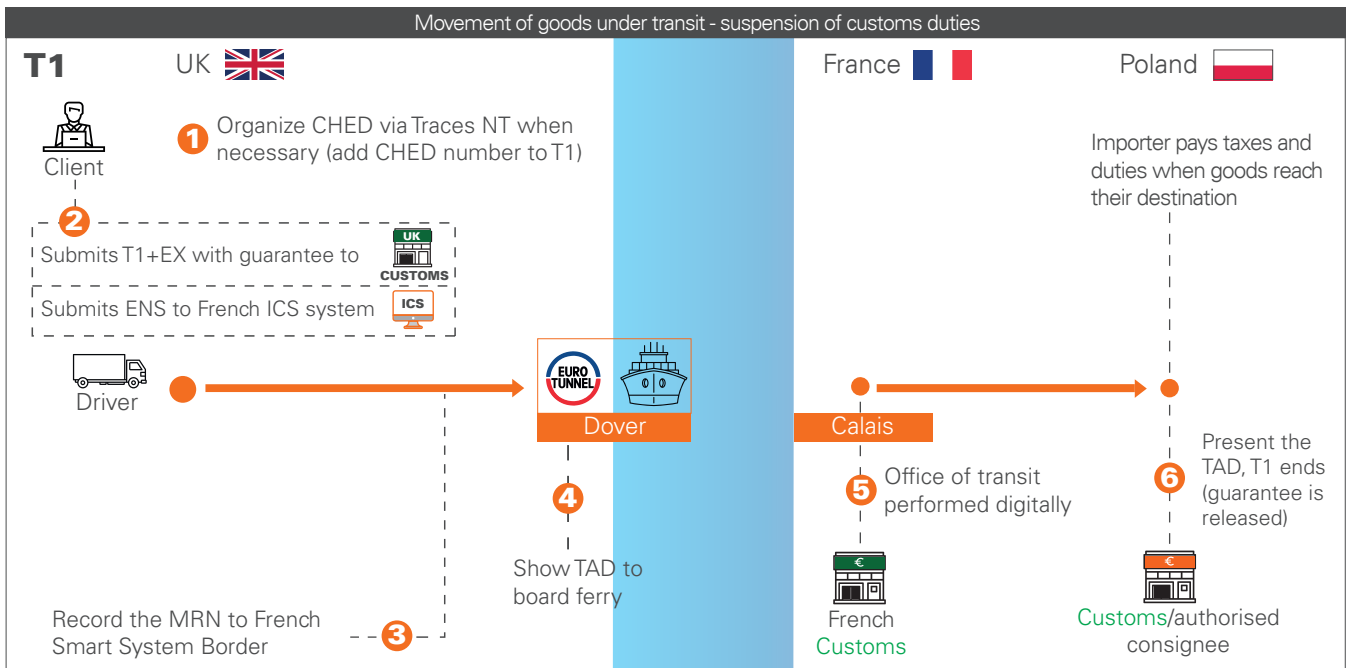

From January 2021, the UK will effectively become what is known as in customs terms, a 'third country'. As a result, any goods UK to EU and vice versa will require Customs Declarations.

Transit is a customs procedure which moves the import clearance of the goods away from the entry point of the EU to an inland location closer to the destination of the goods.

To submit a Transit Declaration, companies need a comprehensive customs guarantee along with customs-adapted software. These can be difficult and expensive to obtain and maintain. In UK SGS TransitNet provides a unique package that offers approved companies a cheaper, more efficient, multinational e-customs transit service – without the need to have your own guarantee or software. Our aim is to take as much of the complexity away from our clients as possible.

Below are a list of the services provided by SGS and through TransitNet to assist our clients post Brexit.

01	Organize CHED via Traces NT when necessary (add CHED number to T1)		→		Performed by SGS <input checked="" type="checkbox"/>
02	Prepare Export declaration with Safety and Security data (add EX number to T1)		→		Performed by SGS <input checked="" type="checkbox"/>
03	Submit Transit with guarantee to UK NCTS		→		Performed by TransitNet <input checked="" type="checkbox"/>
04	Submit ENS declaration to French ICS system		→		Performed by TransitNet <input checked="" type="checkbox"/>
05	Record the MRN to French Smart Border System		→		Performed by SGS <input checked="" type="checkbox"/>
06	Close Transit		→		
07	Complete customs procedures by filing Import declaration *Service available in certain countries including Netherlands and Belgium				Performed by SGS <input checked="" type="checkbox"/>

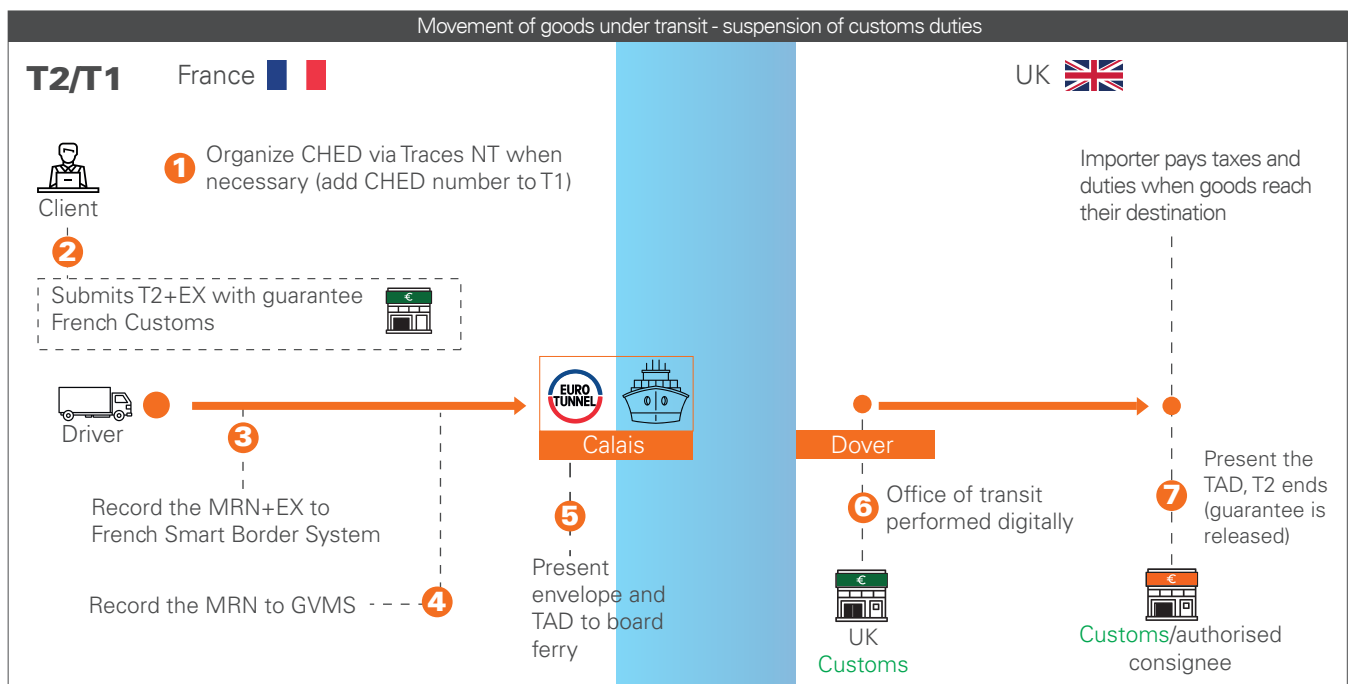

EU to UK checklist

Transit can also be used for shipments between the EU and the UK. Using transit will remove the necessity for importers to pre lodge full import declarations before the goods have even arrived in the UK. Under transit, the clearance of the goods can be completed, including the import procedure and payment of any relevant tax and duties, at a location closer to the actual destination of the goods. Transit is an efficient way for goods to be moved through ports and it reduces the possibilities of control thus saving companies time and money.

Below are a list of the services provided by SGS and through TransitNet to assist our clients post Brexit.

01	Prepare Export declaration with Safety and Security data (add EX number to T2). *Service available in certain countries including Netherlands and Belgium		→		Performed by SGS <input checked="" type="checkbox"/>
