

SGS as AEO/ Authorised Consigner in Türkiye operates a 24/7 authorised warehouse from which transit declarations can be submitted and started without the need to present the goods at customs.

Approved SGS clients can take advantage of our fast lane solution and start transit declarations at SGS's AEO/ Authorised Consigner location saving time and money. SGS's AEO/ Authorised Consigner service is the most efficient way to export goods from Türkiye.

Advantages of starting transit at SGS's AEO/ Authorised Consigner location

- No need to present the goods at an internal Turkish customs office
- Long delays at customs are avoided, saving up to a day in transport time
- Truck is sealed with customs seals
- No additional charges for formalities usually associated with starting transit at internal Turkish customs offices. This includes:
  - No registration fees for Transit Declaration
  - No overtime fees
  - No weighbridge fees
  - No customs agent fees

Process flowchart

1 Truck is loaded at departure

2 Export declaration is lodged (the following guidance must be followed)

3 Truck drives towards location

4 Documents sent to SGS and transit is prepared

SGS TransitNet

5 Driver arrives at location and provides documents to SGS staff who find the transit declaration in TransitNet

TransitNet Çerkezköy YYS/ İzinli Gönderici Deposu

6 SGS staff check truck weight and number of pallets

Sienzi Lojistik Antrepo ve Dış Ticaret Ltd.

7 SGS staff send electronic message for export declaration to declare arrival at exit

8 Customs may decide to control

- Yellow Line — Document control
- Blue Line — No document or physical control (confirmed/trustable status certificate)
- Green Line — No document or physical control (AEO Certificate)
- Red Line — Physical Control- if the system predicts that the goods will be checked according to the red line criteria, the customs inspection officer comes within three hours to facility, and checks the goods with the documents. The customs officer finalizes the export declaration after positive control result

9 After any possible control, SGS staff seal truck

10 Transit declaration is submitted and released and driver can leave
